Frontend Developer with 3+ years of experience building scalable and high-performance web applications using React.js, JavaScript (ES6+), and TypeScript. Hands-on experience developing full-stack applications using Node.js, Express.js, PostgreSQL, and Prisma ORM with expertise in REST APIs, performance optimization, debugging, and responsive application development.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, JSX

State Management & API: Redux Toolkit, Context API, React Query, Axios, RESTful API Integration

UI/UX & Styling: Tailwind CSS, SCSS (Sass), React Bootstrap, Flexbox, CSS Grid, Responsive & Mobile-First Design

Backend & Databases: Node.js, Express.js, PostgreSQL, Prisma ORM, JWT Authentication, REST APIs

Development Tools & Workflow: Postman, VS Code, Git, GitHub

AI & Developer Productivity Tools: OpenAI's ChatGPT, Anthropic's Claude, Amazon Q

Testing & Debugging: Chrome DevTools, QA Testing, Bug Fixing, PropTypes Validation

Core Concepts: Performance Optimization, Clean Code, Component-Based Architecture, Error Handling, Data Validation, Software Development Life Cycle (SDLC)

EXPERIENCE

Dil se Trader Pvt Ltd (LearnKaro Educational Technologies) — Frontend Developer, Sept 2025 – Present | Saharanpur

- Developed and maintained **OpenTradePoster** and **CryptoTradePoster**, scalable web applications built using React.js and modern JavaScript (ES6+), delivering responsive and user-centric interfaces with optimized rendering performance.
 - Improved frontend performance by 40% through code splitting, reducing unnecessary re-renders, implementing memoization techniques and optimizing state management for enhanced application responsiveness.
 - Designed and implemented reusable and modular UI components, improving code maintainability, reducing development effort, and ensuring scalable frontend architecture across multiple modules.
 - Optimized RESTful API integration using Axios and collaborated with backend teams on Node.js and Express.js-based systems to reduce redundant API calls, improve data flow efficiency, and enhance overall application stability.
 - Managed frontend deployments and source code workflows using Git and GitHub, independently handling frontend ownership, version control, and deployment coordination.
 - Participated in technical analysis, bug fixing, code reviews, and production issue resolution to ensure high application availability.
-

LearningMate Solutions Pvt Ltd — Associate Content Technologist, Jan 2023 – July 2025 | Mumbai, India

- Developed and maintained scalable web applications and **LMS** platforms using React.js and modular frontend architecture.
- Improved development efficiency by 25% through reusable component-based development using React.js and Redux.
- Led frontend development and reducing development time by 25% through reusable components.
- Optimized application performance by enhancing API calls, caching strategies, and rendering logic, achieving up to 40% faster load times while following clean coding practices and Git-based workflows.

- Managed CI/CD pipelines using GitHub Actions, performed code reviews, and streamlined deployment workflows to improve development and release efficiency.

EDUCATION

Master's of Computer Applications (MCA) | Lovely Professional University, Jalandhar, India | 2021 – 2023 | GPA: 8.13

PROJECTS

Blue Drinks – Brand Website & E-Commerce UI

- Developed and maintained the frontend for **KLUE Drinks**, a health-focused beverage platform, using React.js, JavaScript (ES6+), Tailwind CSS, and responsive UI development practices.
- Built reusable and modular UI components with a mobile-first architecture, improving scalability, maintainability, and cross-device user experience.
- Improved application performance by 20–30% through rendering optimization, reducing unnecessary re-renders, and enhancing component structure for faster page load times.
- Built reusable and modular UI components, implemented scalable frontend architecture, and developed interactive user interfaces to improve user engagement, maintainability, and overall application scalability.
- Implemented interactive product showcase sections, smooth navigation, and conversion-focused UI features to enhance user engagement and overall user experience.

INTERVIEW DASHBOARD

- Developed a scalable full-stack Interview Tracker application using React.js, Node.js, Express.js, and MongoDB to streamline interview and job application management workflows.
- Implemented secure JWT-based authentication and authorization to protect APIs and enable role-based access to users specific data. Designed and optimized RESTful APIs with CRUD operations, filtering, and sorting for efficient data handling.
- Followed software engineering principles, modular architecture, and REST API best practices throughout the SDLC.
- Designed and optimized RESTful APIs with CRUD operations, filtering, and sorting functionalities to improve data management efficiency and application performance.
- Built a responsive frontend using reusable components, modular architecture, and efficient state management practices to enhance scalability, maintainability, and user experience.

FINANCE TRACKER APP

- Developed and deployed responsive web applications using React.js, Tailwind CSS, React Router, Node.js, Express.js, and MongoDB, implementing reusable UI components and scalable application architecture.
- Built a personal finance management system enabling users to track income and expenses with category-based insights and real-time transaction monitoring.
- Implemented secure JWT and bcrypt-based authentication, optimized API communication, and developed intuitive user interfaces to ensure secure, scalable, and high-performance application workflows.
